Arijit Sen (He/Him)
Data Editor at Scientific American

Honors & awards

Philip Meyer Award, Third Place

Issued by Investigative Reporters and Editors · Jan 2025

Associated with The Dallas Morning News

"A two-year investigation by The Dallas Morning News and the San Antonio Express-News found faster access to blood could have potentially prevented dozens of bleeding deaths each day in rural Texas towns and major cities on both coasts. They partnered with a leading trauma researcher at the University of Alabama at Birmingham to conduct a "first-of-its-kind" demographic and geospatial analysis of areas where access to high-level trauma care is the most difficult. They used categories to classify pre- and in-hospital deaths and excluded patients who were dead on arrival."

Dao Prize in Local Journalism

Issued by Young America Foundation National Journalism Center · Nov 2024

Associated with The Dallas Morning News

SEEK TRUTH: The Second Annual Dao Prize Awards

Science in Society Series Category Award

Issued by National Association of Science Writers · Oct 2024

Associated with The Dallas Morning News

“Lauren Caruba and Ari Sen stare at a reality that most of us would rather look away from: bleeding to death...If you’ve ever watched a medical drama on TV, you might be forgiven for thinking that this rarely happens — that patients suffering from traumatic injuries arrive in the ER in time for treatment; often
this is not the case." -Contest Judges

Announcing the 2024 NASW Science in Society Journalism Award winners

Winner, 2024 Explanatory Reporting, Medium Newsroom

Issued by Online Journalism Awards · Aug 2024

Associated with The Dallas Morning News

"This series informs the public about crucial shortcomings in emergency health care, laying out systemic problems and science-based solutions. It tackles a deeply complex issue with authority, specificity and humanity. This project is notable for its exhaustive and meticulous approach, including the vast number of interviews, significant time spent reporting in the field, patient-centered storytelling and grasp of complex scientific material. Few acts of journalism have the potential to help save lives. This is one of them."

Investigative Reporting — First Place

Issued by Best of the West · Jul 2024

Associated with The Dallas Morning News

"In detailed reporting, vivid photographs and compelling writing, this story brings a shockingly little known but common cause of death to light exposing a national problem with emergency response that causes so many people to bleed out in otherwise preventable deaths,... It's a stunning package." -Contest Judges

Silver Showcase Award for Enterprise and Innovation in Journalism - Investigative

Issued by Texas Headliners Foundation · May 2024

Associated with The Dallas Morning News

Showcase Awards 2023 — Headliners Foundation

Health and science writing by an individual or team, 2nd Place

Issued by National Headliner Awards Newspapers · Apr 2024

Associated with The Dallas Morning News

IRE Award

Issued by Investigative Reporters and Editors · Apr 2024

Associated with The Dallas Morning News

"Judges' comments: This was a comprehensive investigation into a national health crisis hiding in plain sight: the tens of thousands of Americans who bleed to death from potentially survivable injuries each year. The team reviewed more than 300 medical journal articles and did exhaustive data work to create a map showing the distance from any address to the closest trauma center, highlighting the stark disparities between rural and urban communities. The judges were impressed by the in-depth reporting, clear writing, compelling presentation and focus on solutions to this pressing issue."

Associated with The Dallas Morning News

James Madison of Freedom of Information Award

Issued by Northern California Society of Professional Journalists · Mar 2022

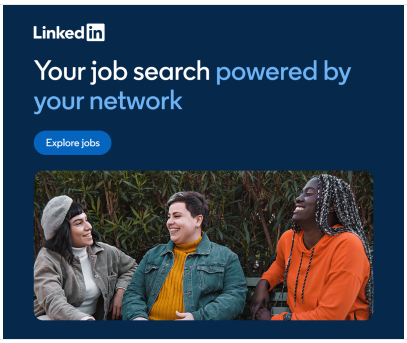

Associated with The Dallas Morning News

"Ari Sen tracked the use of surveillance technologies to monitor student speech online. Sen filed numerous public records requests to school districts and public colleges to reveal their use of monitoring technologies that spy on students' email, social media, Hangout chats and Google Docs.

To assess the number of students who had been surveilled, Sen also combined data from GovSpend, an organization that tracks state and local government spending across the country, with government school enrollment data. Sen published the data visualization and story in the Dallas Morning News, where he was an intern while he was a student at the University of California, Berkeley Graduate School of Journalism." -NorCal SPJ

Rachel-Rivers Coffey North Carolina High School Journalist of the Year 2016

Issued by North Carolina Scholastic Media Association · Jun 2016
